

Painful Hearing

Henk Beerepoot, 'Melita Park', 30/10/2011

Dear Friends,

Our people live in blindness. 'Religion' is at an all time low. Though, the further they have rejected all 'expressions' of religion, the closer is their inner desire to be protected. This inner desire to 'belong' is the communication of our Sovereign Father within our people and His communication to them. He expresses their... subconscious desire to become fulfilled, to 'hear' Him, to become One with Him. This subconscious desire to hear Him has caused the success of the sales of all communication appliances in the last 60 years, climaxing in the enormous sale of mobile telephones at the present time.

A 'telephone' is a device through which we can hear 'sound' (phone) from 'far' (tele)..., to hear sound from the outside...

I have just written a short article '[Apple and Snow White](#)' wherein I showed that the success of the sales of the latest mobile phone, the Apple 'iPhone4S' symbolises the timing of the death of 'Self' and that we, as the people of Israel, have entered into a time of healing. The meaning of the iPhone4S indicates that 'one desires to See and Hear' but, as one 'eats' from the 'Apple', one cannot hear Him, one cannot become fulfilled, one cannot come to Life'

Now the time has come that some of us are hearing The Sound, but from...within...

Just yesterday I read that Samsung has overtaken the sales of Apple with their Smartphone. This is remarkable, as the Korean name for Samsung means 'tristar', a word which, according to the company, means: 'Powerful Eternity'. Most remarkably is the meaning according to the phonetics of the word 'Samsung', which confirms their meaning of 'powerful eternity', which is: '*chaos consumed into Life*'...! Then there is the name of the hearing device, which is the 'Smartphone'. In our modern use of the language the word 'smart' has the meaning of 'bright, sharp or clever' however, according to the etymology of the word 'smart' the meaning is: '*Pain*'. Putting the meaning of the words 'Samsung' and 'Smartphone' together, it shows: '*Chaos is consumed into Life by Painful Hearing*'.

The 'Chaos' is 'self' and the hearing is painful, it pictures the sound of Samsung, the '*Powerful Eternality*', the sound of 'Life'.

When we hear 'The Sound' within, instead of hearing (phone) sound from far (tele), our flesh experiences pain unto death in order to come to Life.

I pray you see the wonderful shift in our 'instrument of hearing' which has occurred last week. As the Apple has brought us to our death, so will Samsung lead us to Life.

Kind regards,
Henk Beerepoot
'Melita Park'

P.S.

Did you enjoy the words of Malcolm Muggeridge? Albert Ein-Stein, the father of 'external suppositions', spoke also some remarkable words when he said: "*The next frontier to be explored is inner space*". Prophetic words indeed, though only heard by those in their inner space, a Sound who reveals to them their New Frontier.
